SUMMARY

An Information Technology graduate with hands-on experience in IT support, network operations, and technical troubleshooting. Experienced in real-time network monitoring using Zabbix, diagnosing OLT/ONT issues via Telnet, and managing incident escalation workflows through Odoo while supporting corporate, retail, and government clients. Skilled in hardware and software support, Windows system administration, network maintenance, and coordinating with technical teams to ensure service reliability and SLA compliance. Passionate about solving technical problems, maintaining reliable IT infrastructure, and continuously expanding my knowledge of networking and IT systems.

WORK EXPERIENCE

PT Remala Abadi – Customer Service (NOC)

April 2026 – present

- Managed communications and technical inquiries for corporate (B2B), retail, and government institution (Disdik) clients via VoIP, WhatsApp, and phone.
- Monitored network infrastructure real-time using Zabbix to proactively detect service outages and network degradations.
- Conducted initial troubleshooting on network equipment (OLT/ONT) via Telnet to diagnose and analyze service disruptions.
- Analyze the device's technical parameters, including run state and last down cause (such as dying-gasp, LOS, etc.), to ensure the accuracy of outage data.
- Administered end-to-end incident ticketing workflows from creation to resolution using the Odoo ticketing platform.
- Executed precise escalation procedures by dispatching validated technical issues to the field engineering and technical support teams.
- Coordinated closely with technical teams to track issue resolution progress and ensure strict adherence to company Service Level Agreements (SLAs).

SMK Binakarya Mandiri – IT Intern

September – December 2024

- Provided technical support for hardware, software, and network issues to ensure smooth school operations.
- Installed, configured, and maintained Windows-based systems and supporting applications.
- Monitored and maintained PCs, local network infrastructure, and peripheral devices during ANBK activities.
- Collaborated with teachers and staff to ensure uninterrupted teaching and learning activities.

PT Fajar Langgeng Sejahtera - IT Intern

July – September 2022

- Maintained and updated website content to support daily business operations.
- Ensured data accuracy for product listings and system information.
- Supported internal teams by troubleshooting minor system and website-related issues.

EDUCATION

Bina Sarana Informatika University

Bachelor's Degree in Information Technology

2021-2025

IPK: 3.83/4.00

SKILLS

- Operating Systems
- Ticketing & CRM Systems
- Network Monitoring & Diagnostic
- Network Fundamentals
- IT Support & Troubleshooting
- Communication & Documentation
