SUMMARY

Fresh graduate with a Bachelor's degree in Information Technology, specializing in Backend Development using Laravel. Experienced in building PHP and Laravel-based web applications, including REST API development, database management, and authentication systems. Familiar with MySQL, Git, and MVC architecture, with a strong ability to learn new technologies and build scalable backend solutions.

PROJECTS

E-Commerce API Service

Laravel, MySQL, Midtrans

- Developed a RESTful e-commerce backend API with checkout and inventory management.
- Automatic inventory restoration when orders are cancelled.
- Integrated Midtrans payment gateway for secure transaction processing.

Teacher Performance Assessment System

Laravel, MySQL, Laravel PDF

- Built a web-based system to digitize teacher performance evaluation processes.
- Designed relational database schema and implemented CRUD features.
- Implemented PDF report generation using Laravel PDF for automated performance evaluation reports.

WORK EXPERIENCE

SMK Binakarya Mandiri – IT Intern

September – December 2024

- Developed a Teacher Performance Assessment web application using Laravel and MySQL, transforming manual administrative processes into an integrated digital system.
- Designing relational database schemas, implementing efficient CRUD features, and ensuring data integrity for annual performance reporting.
- Identified and resolved technical issues in school operational systems, improving device uptime for learning support systems to 95%.
- Prepare technical documentation and system maintenance reports.

PT Fajar Langgeng Sejahtera - IT Intern

July – September 2022

- Manage the company website's content management system (CMS), ensuring the accuracy of stock data and product specifications for daily e-commerce operations.
- Supporting digital marketing activities through dynamic website content updates in line with business strategy requirements.
- Coordinate with the warehouse team to synchronize product stock in real time on the website system to prevent overselling.

EDUCATION

Bina Sarana Informatika University
